TRADEPROOF · CLOUD OPERATIONS

Building and supporting a cloud platform

Jeff Cadet · Cloud / Platform Support Engineer

I built and support the cloud infrastructure behind TradeProof, a contractor verification platform. My work spans Azure provisioning and Google Cloud production operations.

How the live platform works

INITIAL V1.2 BUILD

Microsoft Azure

Bicep · Container Apps
Private networking · Key Vault

PRODUCTION PLATFORM

Google Cloud

Compute Engine · Artifact Registry
Cloud Storage · Cloud Monitoring

What I handled

- **Deploy:** Docker releases and automated checks with GitHub Actions.
- **Secure:** Network access, IAM permissions, secrets and staff MFA.
- **Support:** Fix startup errors, permission issues and failed scheduled jobs.
- **Recover:** Verify backups, test restores and check service health.
